# HANDWRITING EXTRACTION

Annotation Extraction based end to end automation

Background

A leading consumer products company wished to automate its delivery and return process which dealt with hand-written annotations

WHY CHOOSE CLOUDCRAFTZ?

- Experienced Professionals with multi-decade business experience

- Hands-on project involvement by partners

- Proven fast prototyping-solutioning approach

- Relentless focus on innovation and technology management

- Success-based engagement models tailored to clients' needs.

Requirements

Customer wanted to use computer vision and contextual NLP to extract, infer, match and verify delivery information from handwritten annotations on delivery notes.

Solution

Created a proprietary solution to infer the relevant annotation. Now in process of delivering an end-to-end solution which starts with data capture through a front-end application and integrated to the customer ERP platform.

Benefit

Once deployed, customer will be able to significantly speed up the delivery reconciliation process.
